State Fiscal Service of Ukraine (Article 4.3)

Expert support on risk management, training, seminars for officials.

Study visits to train SFS officials on best practices in risk management during the customs control.

Purchase of software to maintain the Risk Management System.

Purchase of server equipment to enable centralized collection, storage and processing of information on the results of customs control.

Purchase of computer and other necessary equipment to enhance the capabilities of analytical units in customs.

The State Enterprise "Ukrainian Sea Ports Authority"

To implement the project of National Maritime Single Window and national segment of Advanced National Networks for Administrations project and paperless pilot registration of ships in ports of Ukraine, we need the investment assistance for:

- research on the development of projects, technological schemes, description and optimization of business processes;

- technical assistance to provide computer facilities for national administrations involved in projects.
